Hi there.

I am the author of the chocolatey package for resource hacker:

<https://chocolatey.org/packages/reshack>

I would like to embed the installer in the package as it is more stable and avoids problems like this one:

<https://github.com/chocolatey/chocolatey-coreteampackages/issues/1017>

No changes or anything is done to installer itself, only silent install script is included and metadata.

I require your permission for that since there is no info about redistribution rights on your site that I can see.

Thanks.

Hi Moidrag.

What you're suggesting sounds fine to me. Thanks for checking.

Angus
