Yes I have no problem if you distribute the ORIGINAL installers without cracks etc 😊

Hi,

Just to be explicitly clear, you are giving approval for the installers of the 'lite', 'pro', and 'ultimate' versions of Xplorer2 to be embedded in and distributed via Chocolatey packages available in the community repository (<https://community.chocolatey.org>)?

I will include your license for each in the packages as well as this email exchange.

Thanks,  
Teknologidgist
